ABOUT PBR INTERNATIONAL

Established in 2004 and based in Cape Town, South Africa, PBR International specialises in the manufacturing and supply of the highest quality horticultural, floricultural and agricultural products, including powders, liquids, gel rooting hormones and fertilisers.

PBR International is widely considered one of the leading specialists in the field of cutting organic fertilisers. We supply some of the largest production, commercial and retail nurseries as well as commercial distribution companies and supermarket chain stores in numerous countries.

ABOUT OUR FOUNDING DIRECTOR

Meet Elandre, our co-founding director. Elandre's primary focus areas are product development, technical advise, new product sourcing, regulatory affairs and international growth.

Elandre tends to our international clients by sourcing new international market opportunities.

He manages our client base in Jamaica, Netherlands, Mauritius, Eastern and Western Africa as well as other international markets.

If you are interested to know more about PBR International and our products, please feel free to contact him on elandre@pbrtrading.com.

ABOUT OUR FLAGSHIP PRODUCT

PBR International is best known for its rooting hormone powder. We have been manufacturing rooting hormone powders for softwood, semi-hardwood and hardwood plants for close to 18 years now, with tonnes and tonnes of rooting hormones being shipped to the international markets across the globe. Our rooting hormones number 1,2 & 3 are leaders in the market and something we are exceptionally proud to have achieved.

ABOUT OUR PRODUCTS

<p>DIP&ROOT™ Rooting Hormone Liquid</p> <p>Dip&Root is a liquid rooting hormone concentration used to stimulate fast and prolific rooting of plant cuttings. The active ingredients are Indole-3-Butyric Acid (IBA) & Naphthyl Acetic Acid (NAA). Dip&Root is used on the more "difficult to root" plant cuttings. The two actives work together to enhance the rooting of the cutting and to promote vegetative growth.</p>		<p>DYNAROOT™ Rooting Hormone Powder</p> <p>DynaRoot Powder No. 1, 2, & 3 is a rooting hormone powder, used to stimulate fast & prolific rooting of plant cuttings. Available in 3 Concentrations: DynaRoot Gel - No 1: Softwood cuttings. DynaRoot Gel - No 2: Semi-hardwood cuttings. DynaRoot Gel - No 3: Hardwood cuttings.</p>		<p>DYNAROOT™ Rooting Hormone Gel</p> <p>DynaRoot Gel is a rooting hormone gel, used to stimulate fast & prolific rooting of plant cuttings. The active ingredients are Indole-3butyric Acid (IBA) & Naphthyl Acetic Acid (NAA). Available in 3 Concentrations: DynaRoot Gel - No 1: Softwood cuttings. DynaRoot Gel - No 2: Semi-hardwood cuttings. DynaRoot Gel - No 3: Hardwood cuttings.</p>	
<p>DYNAMIST™ Cutting Mist Spray</p> <p>DynaMist Rooting Spray is a non-toxic blend of essential vitamins, minerals, amino acids and additives, which help prevent losses in the critical first few days when they are at their most susceptible and also helps prevent dehydration in your cuttings. Use DynaMist Rooting Spray to pre-treat mother plants and as a foliar spray for propagating plants.</p>				<p>DYNA GRO™ 8 - 2 - 6 (16) Liquid Plant Food</p> <p>DynaGro (8:2:6) is an environmentally friendly and non-hazardous liquid fertilizer plant food concentrate containing all the required trace elements, ready to use for all kinds of plants. DynaGro is odourless, does not coagulate and is free of animal products. It contains no salt-chloride which most notably causes root burn and precipitation. Suitable for all kind of plants, environmentally friendly and harmless to bees and all other animals.</p>	
<p>CULTURED SOLUTIONS™ PREMIUM HYDROPONIC NUTRIENTS</p> <p>Cultured Solutions® premium hydroponic nutrients are formulated with only the finest mineral salts, providing an exceptionally well balanced, highly-soluble nutrient solution for explosive growth. The nutrients contain no added dyes or preservatives ensuring only the highest quality fruits and flowers.</p>		<p>DYNABALL™ Cloning Ball</p> <p>Air layering has become an easy and practical method of propagation thanks to the DynaBall. DynaBall comes in two colours - green and transparent. Our green DynaBall is UV protected, whereas the transparent ball allows for seeing the roots. Also available is our hybrid DynaBall which is half green and half transparent - the best of both!</p>		<p>DYNA GRO™ Ready To Use Liquid Plant Food</p> <p>Our specifically formulated Ready-To-Use (R.T.U.) Liquid fertilizer range, is 100% environmentally friendly, contains all the required trace elements and is available in the following 3 mixtures:</p> <ul style="list-style-type: none"> • Rose fertiliser • Orchid fertiliser • Lawns and shrubs fertiliser
