

ROOTS 'n' SHOOTS

FEBRUARY, 2022

HAPPY NEW MONTH!

And just like that, January is gone! Granted, it felt like January in itself was 3 months long, because most of January was spent recovering from the festive season, and trying very hard to get back into "work mode". The weather in Cape Town has been extra nice lately, so being in the office working has been particularly difficult.

If you are a parent, January was also the start of the school year, and with that comes, school shopping and school traffic.

Wow, but January really was jam-packed! PBR International is back in the office and ready to assist you with all of your propagation needs. If you have a propagation conundrum that you need help with, please feel free to contact us so that we can assist you. We have loads in store for the coming year and we can't wait to share all the details with you. Stay tuned to our socials and our monthly newsletter for giveaways, product launches, special deals and more!

COMING SOON

If you follow us on Social Media, you would have seen some talk about PBR International launching an online factory shop soon. We are very excited about this, and can't wait to share the details with you once we go live. You can expect an easier way of purchasing your favourite products, different payment methods, and amazing discounts.

Our online factory store is something that we have been working hard on over the past few months, so get ready to have a more convenient way of making purchases.

DYNABALL FACELIFT

We have heard your feedback, taken your notes seriously and have gone back to the drawing board to give our favourite DynaBall a mini facelift.

Many of you have commented about the growing medium drying out and the difficulty of putting the cable ties on if you are doing the grafting yourself, so we have made some small changes to the DynaBall.

Our local manufacturer is hard at work to change the design so that it is a better user experience for you.

Stay tuned for the re-launch of the DynaBall.

DON'T FORGET

PBR International has a wide variety of products to help you with every phase of your propagation cycle. We have DynaMist, which is a pre and post cuttings spray, used in the critical first stages of cutting. Dynamist encourages rapid root development while helping to minimise plant stress. We have a big variety of different rooting hormones, powder, gel and liquid. Our gel and liquid rooting hormone have two active ingredients, namely IBA and NAA. This makes sure your plants have a high rooting strike rate and great vegetative growth.

PBR International also has a liquid fertiliser - DynaGro which has shown amazing results for our farmers who are growing vegetables. We are **immensely** proud of our ready to use DynaGro which is specially formulated for Orchids, Roses as well as Lawns and Shrubs.

We can't wait to show you what we have in store for the year ahead! If you have any questions, or need any assistance, please do get hold of us. You can call us on +2721 300 0119 or email Chanelle at chanelle@pbrtrading.com
